

Guano

Re-Gen Farming's aim is to increase biological activity in your soil. Balanced nutrition leads to healthy soils which are alive with microbial and other soil organism activity, leading to healthy plants, healthy stock, a healthier planet, and healthier profits. Organic fertilisers provide essential and trace elements to your soil. Re-Gen Farming has access to seabird guano, which over time has been transformed into a rich mineral high in phosphate and the right balance of trace elements and minerals. Guano is a natural product, so it works in harmony with your soil biology and has many advantages.

Applications

Guano can be supplied in granules, 20kg bags, 1 tonne bulker bags or in bulk.

- Granules are suitable for application with seeders, and run smoothly in augers and spreaders
- Granules are suitable to blend with other granular products (SOA, Humate)

Typical Analysis Total

Phosphorus12%
Calcium~ 29%
Silica~ 10%

Also contains organic carbon and other trace elements – Potassium, Sulphur, Magnesium, Iron, Manganese, Zinc and Boron

Recommendation – the following rates are recommended when using granules

- Cereals/Canola/Legumes 50—250 kg
- Vines and Tree Crops 50—500 kg
- Pasture/Lucerne 70—250 Kg
- Horticulture 50—500 Kg (Potatoes, Onions, Carrots)

To enhance the benefits of guano, treat seed with a quality bio stimulant such as (TM Germination) prior to sowing.

Benefits

- Non-leaching to provide *season long* nutrition
- Builds nutrition density in soil
- Environmentally responsible
- Cost effective
